BoostMaster

Reliable Timing when you need it!

Press that boost button for instant ON/OFF control and walk away knowing you're saving energy and money! Simply install Timeguard's new Electronic Boost Timers TGBT4 (up to 2 hours) or TGBT5 (1 to 4 hours) which automatically count-down the selected time period you set, making it ideal for immersion heaters, room heaters, heated mirrors, towel rails & lighting.

We have also 'boosted' our popular 24 hour & 7 day Fused Spur Timeswitches (FST11A/FST17A) with 1 and 2 hour boost facility and automatic summer/winter changeover.

For our complete Boostmaster, Supplymaster & immersion heater time controller ranges visit
